## **NO. 20 DROP TRACK JACK MAXON PATENT**

**The Maxon Patent Jack** is the invention of one of the most practical road-masters of the country, and is both simple and durable.

The Jack is made in various sizes and

of different capacities, a couple of them being shown herein.

The Drop Track Jack gives perfect control of the track without any danger of slipping, and has given the greatest satisfaction for twenty years.

The Foot Lift Screw Jack is also very popular and is used extensively on many of the principal railroads of the country.

These Jacks are Manufactured by  
**THE DAYTON IRON WORKS CO.**  
successors to  
**The Boyer & Radford Mfg., Co.**  
**DAYTON, OHIO**
